Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 94-99 are rejected under 35 U.S.C. 103 as being unpatentable over Peitit et al J. Natural Products (1984) 47 pp 913-919 taken with Faber et al Helv. Chim. Vol. 56 (1993).

Peitit et al teach compounds to recited claim 94. See, e.g., 1a, 1b, 2, 3, 4a-c (page 915), the composition and method of use thereof. Faber et al teach analogous products. See page 2883 XV. The references differ in the position of the corresponding OR₁ substituent, para vs. meta position. However, the similarity between the chemical structures and properties is sufficiently close that one of ordinary skill in the art would have been motivated to make the claimed compositions in searching for new pharmaceutical compositions. Prior art structures do not have to be true isomers to render structurally similar compounds *prima facie* obvious. *In re Payne*, 606 F.2d 303, 203 USPQ 245 (CCPA 1979)

Regarding applicants' comments it is noted that phenyl ring substituents and their position on the ring are readily interchangeable in these compounds e.g. OH, OCH₃ and H are readily interchangeable at the distal ends in these type of antineoplastic active compounds. Note, for example, figure I of Pettit. Also, the R₅ and alpha position substituents are also taught in the prior art. Note, for example, figures in page 915 of Pettit.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
